ABOUT ME

Back-end-focused Full-Stack Developer with a strong track record of architecting clean, scalable solutions to complex technical challenges. Uses technologies such as **PHP** and **JavaScript**—including **Laravel** and **Node.js, etc**—and is currently delving into **Golang(Fiber)**. Skilled in the entire software development lifecycle—from optimizing existing features to designing new ones. I am very passionate about exploring new technologies and hope to help others in this field.

SKILLS

Front-End	: HTML, CSS, JavaScript, React, Vue, Tailwind CSS
Back-End	: PHP, Laravel, Node.js, Express.js, Golang
Databases	: MySQL, PostgreSQL, MongoDB, MSAccess, Oracle, SQLite
Tools	: Git, Github, GitLab, Docker, Redis
Servers	: AWS, Tencent, Cloudflare, CI/CD
AI Tools	: LLM, OpenCode/ ClaudeCode, 9Router, Hermes

EXPERIENCE

Full-Stack Developer - PT Medika Digital Nusantara | Yogyakarta, Indonesia | January 2026 – Now

- Develop and maintain comprehensive Hospital Information Systems for multiple healthcare institutions using PHP, CSS, Javascript and OracleDB
- Architect and implement clinic web applications and focusing on ease of use and maintenance using Laravel and MySQL.
- Create a web interface based on the framework of the Analyzer System.
- Optimize complex database schemas and queries to ensure accurate, real-time data usage.
- Use Docker to Ensure Consistency in System Requirements.
- Use pipelines and CI/CD to simplify deployment to the server.
- Managed server environments on Newrelic to monitor application health, diagnose issues through log analysis, and resolve production incidents with minimal downtime.
- Implemented data caching strategies using Redis to store frequently accessed database queries, successfully reducing API response latency.
- Integrated AI-assisted development tools Claude Code into daily workflow, reducing boilerplate code generation time by ~50% and accelerating feature delivery.

Tech Stack : **PHP, HTML, CSS, JS, Laravel, Tailwind CSS, Oracle, Mysql, Gitlab, Redis, AI-assisted tooling.**

Full-Stack Developer - Freelance | Yogyakarta, Indonesia | August 2025 – January 2026

- Developed a total of 10+ web and mobile applications for clients in the industrial sector using Laravel, Golang, Flutter, React.js, Bootstrap, Tailwind CSS.
- Created a responsive admin dashboard with React.js and Tailwind CSS, displaying real-time analytics with data visualization using Charts and Tables.
- Built systems with Laravel libraries such as Spatie, Breeze, Octane, and Inertia to simplify and accelerate application development.
- Built mobile applications used for employee management, such as attendance, task distribution, and overtime, supporting lazy loading and real-time data using Flutter and Golang.
- Designed and implemented a RESTful API used by 10+ daily active users to handle transactions with 99.9% uptime using Laravel and Golang microservices architecture.
- Designed web layouts according to Figma designs using Tailwind CSS.
- Used AWS S3 for file storage (pdf, excel, jpg, png).
- Collaborated with a team of 2-3 people using Git/GitHub for version control, implementing Agile and Kanban methodologies.

Tech Stack: **Laravel, React.js, Tailwind CSS, Bootstrap, Flutter, Golang, MySQL, GitHub Actions, Agile, Kanban.**

Full-Stack Developer - Internship | PT. Duta Wakaf Indonesia | Yogyakarta, Indonesia | October 2024 – January 2025

- Led development of SWAKARTA, a Waqf-based CMS platform with 20 customizable templates built on Laravel MVC, enabling non-technical users to launch professional websites in under 30 minutes.
- Built a modular template system using Laravel MVC architecture to support dynamic content management.
- Collaborated with a cross-functional team of 4–6 members using Git/GitHub for version control, implementing Agile development through Agile and Kanban (Trello) methodologies.

Tech Stack: **Laravel, Breeze(Laravel), Bootstrap, JavaScript, MySQL, Git, Kanban, Agile.**

EDUCATION

- Bachelor of Informatic System - Universitas AKPRIND Yogyakarta (2021 - 2025) – IPK 3,47
