ABOUT ME

Full Stack | Backend Developer with about < 2 years of experience building and maintaining hospital and clinic information systems using **PHP, Laravel**, MySQL, and Oracle. Experienced with **Docker, CI/CD, Redis** caching, and production incident handling. Familiar with **Go and Flutter**.

SKILLS

Front-End	: HTML, CSS, JavaScript, React, Vue, Tailwind CSS
Back-End	: PHP, Laravel, Node.js, Express.js, Go
Mobile	: Flutter
Databases	: MySQL, PostgreSQL, Oracle, MongoDB
Tools	: Git, GitHub, GitLab, Docker, Redis, RabbitMQ, Elasticsearch, New Relic
Cloud	: AWS, Tencent
AI Tools	: Claude Code
Language	: Indonesian (native), English (intermediate)

EXPERIENCE

Full-Stack Developer - PT Medika Digital Nusantara | Yogyakarta, Indonesia | January 2026 – Present

- Develop and maintain comprehensive Hospital Information Systems for multiple healthcare institutions using PHP, CSS, JavaScript and Oracle Database
- Build clinic web applications with Laravel and MySQL, focused on usability and maintainability.
- Built a web interface based on the framework of the Analyzer System.
- Optimize complex database schemas and queries to ensure accurate, real-time data usage.
- Use Docker and GitLab CI/CD pipelines to keep environments consistent and simplify deployment.
- Monitor application health with New Relic, diagnose issues through logs, and handle production incidents.
- Implemented data caching strategies using Redis to store frequently accessed database queries, successfully reducing API response latency.
- Use Claude Code to speed up boilerplate and feature development.

Tech Stack : **PHP, HTML, CSS, JS, Laravel, Tailwind CSS, Oracle, MySQL, GitLab, Redis, Docker, New Relic, AI-assisted tooling**

Full-Stack Developer - Freelance | Yogyakarta, Indonesia | August 2025 – January 2026

- Continued development and maintained web and mobile applications for clients using Laravel, React, Tailwind CSS, and Flutter.
- Developed features and maintained a Laravel-based microservice architecture.
- Worked on an employee attendance application with a Flutter frontend and a Go backend.
- Built a responsive admin dashboard with React and Tailwind CSS, featuring charts and tables.
- Used Laravel packages such as Spatie, Breeze, and Inertia to speed up development.
- Implemented Figma designs with Tailwind CSS and used AWS S3 for file storage.
- Worked in a 2–3 person team using Git/GitHub and Kanban.

Tech Stack: **Laravel, React, Tailwind CSS, Bootstrap, Flutter, Go, MySQL, GitHub Actions, Agile, Kanban.**

Full-Stack Developer - Internship | PT. Duta Wakaf Indonesia | Yogyakarta, Indonesia | October 2024 – January 2025

- Contributed to SWAKARTA, a Waqf-based CMS platform with 20 customizable templates built on Laravel MVC, letting non-technical users launch websites in under 30 minutes.
- Built a modular template system using Laravel MVC to support dynamic content management.
- Worked in a 4–6 member team using Git/GitHub and Kanban (Trello).

Tech Stack: **Laravel, Bootstrap, JavaScript, MySQL, Git, Kanban, Agile.**

EDUCATION

- Bachelor of Informatics - Universitas AKPRIND Yogyakarta (2021 - 2025) – GPA 3,48/4.00
